 JUNE 2025

Introduction

Welcome to the **Brainet Analytics School Management Information System User Guide**.

This guide has been prepared to provide users with a comprehensive understanding of the Brainet Analytics platform and to serve as a practical reference for the effective use of its features. Whether you are a System Administrator, Principal, Deputy Principal, Teacher, Accountant, Admissions Officer, Examination Officer, Librarian, or other authorized user, this manual is designed to help you navigate the system with confidence and efficiency.

Brainet Analytics is a comprehensive, cloud-based School Management Information System (SMIS) developed to transform the management of educational institutions by integrating academic, administrative, financial, and analytical processes into one secure platform. The system simplifies daily school operations by reducing paperwork, improving communication, automating routine tasks, and providing accurate, real-time information to support effective decision-making.

This user guide explains the purpose of each module, the responsibilities associated with each user role, the dashboards available to different users, and the procedures for performing everyday tasks within the system. Each chapter includes detailed explanations, practical guidance, illustrations, and screenshot placeholders that can be replaced with actual system interfaces for future editions.

As Brainet Analytics continues to evolve through regular updates and new features, this guide will also evolve to ensure that users always have access to accurate and relevant information.

It is our sincere hope that this manual will enable every user to utilize Brainet Analytics effectively, improve institutional efficiency, and contribute to excellence in educational management.

Thank you for choosing **Brainet Analytics** as your trusted School Management Information System.

Acknowledgements

The successful development of **Brainet Analytics School Management Information System** represents the culmination of dedication, innovation, continuous learning, and a passion for transforming educational management through technology.

I extend my heartfelt gratitude to Almighty God for His guidance, wisdom, strength, and protection throughout the planning, design, development, testing, and successful deployment of this system.

My sincere appreciation goes to the school administrators, principals, teachers, accountants, ICT personnel, and other education professionals whose valuable insights, practical experiences, and constructive feedback greatly contributed to improving the functionality and usability of Brainet Analytics.

Special thanks are also extended to every institution that has placed its trust in Brainet Analytics. Your confidence, encouragement, and willingness to embrace digital transformation continue to inspire the ongoing enhancement of this platform.

I am grateful to the open-source software community whose technologies and frameworks—including Python, Django, PostgreSQL, Bootstrap, JavaScript, HTML5, CSS3, Cloudinary, Git, and many other modern development tools—have provided a strong foundation for building a secure, scalable, and reliable school management solution.

Finally, I would like to express my deepest appreciation to everyone who has supported, encouraged, tested, and believed in this vision from its earliest stages. Your contributions have played an important role in making Brainet Analytics a reality.

It is my hope that this system will continue to empower educational institutions by simplifying school administration, enhancing accountability, improving academic performance, and supporting data-driven decision-making for many years to come.

Thank you for being part of the Brainet Analytics journey.

tChapter 4 – Principal Dashboard

- Introduction
- Who is a Principal?
- Responsibilities
- Daily Workflow
- Dashboard Overview
- Every Dashboard Card Explained

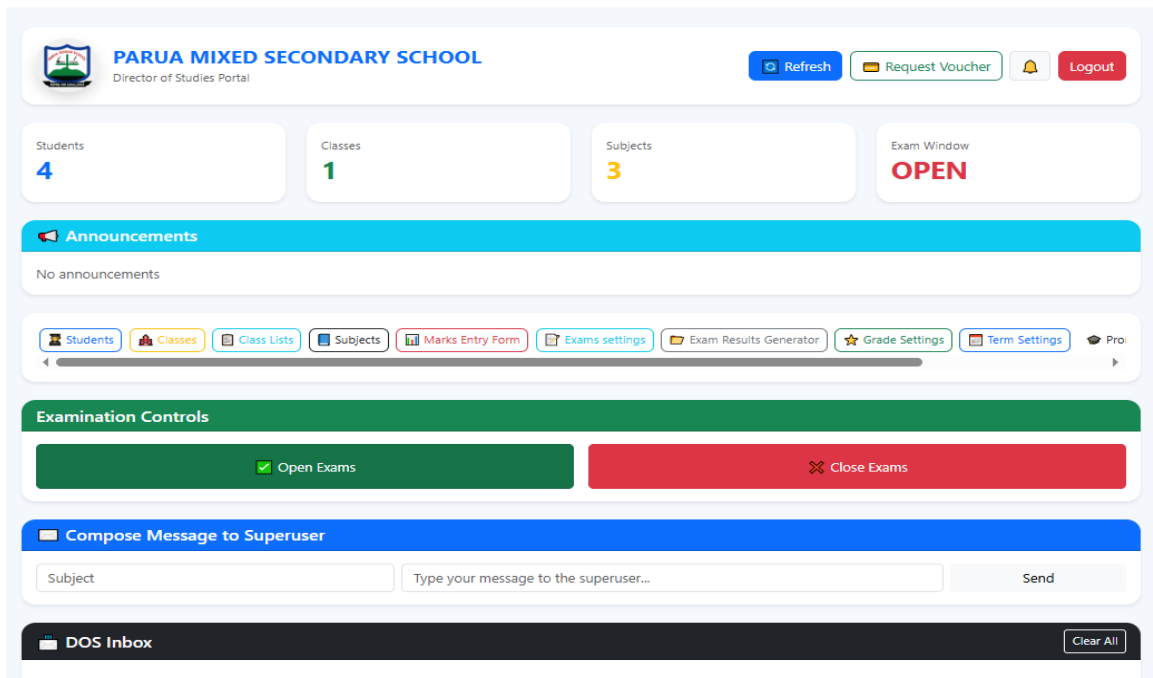

- Every Menu Explained
- Reports Available
- What the Principal Can Do
- What the Principal Cannot Do
- Advantages
- Limitations
- Best Practices
- Frequently Asked Questions
- Screenshot Placeholder (Dashboard)
- Screenshot Placeholder (Reports)
- Screenshot Placeholder (Analytics)

Chapter 5 – Director of Studies (DOS)

Explain:

- Role in the school
- Daily academic responsibilities
- Examination management
- Approving marks
- Monitoring teachers
- Monitoring attendance
- Reports
- Performance analysis

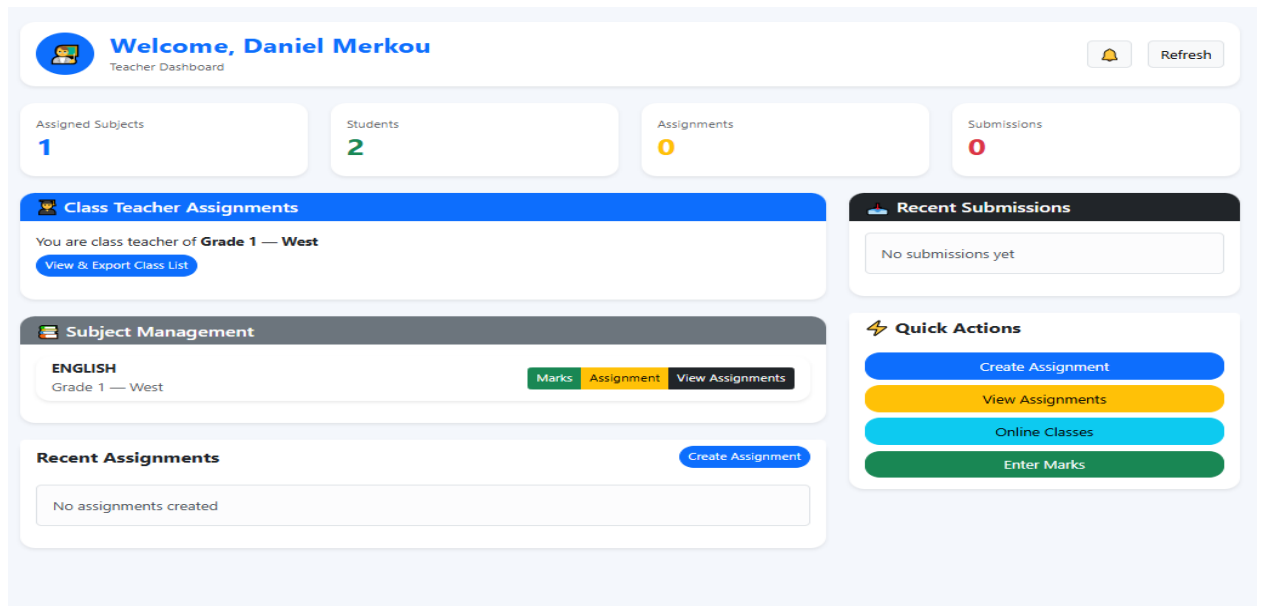

- Dashboard widgets explained one by one
- Screenshot placeholders

Chapter 6 – Teacher Dashboard

Explain:

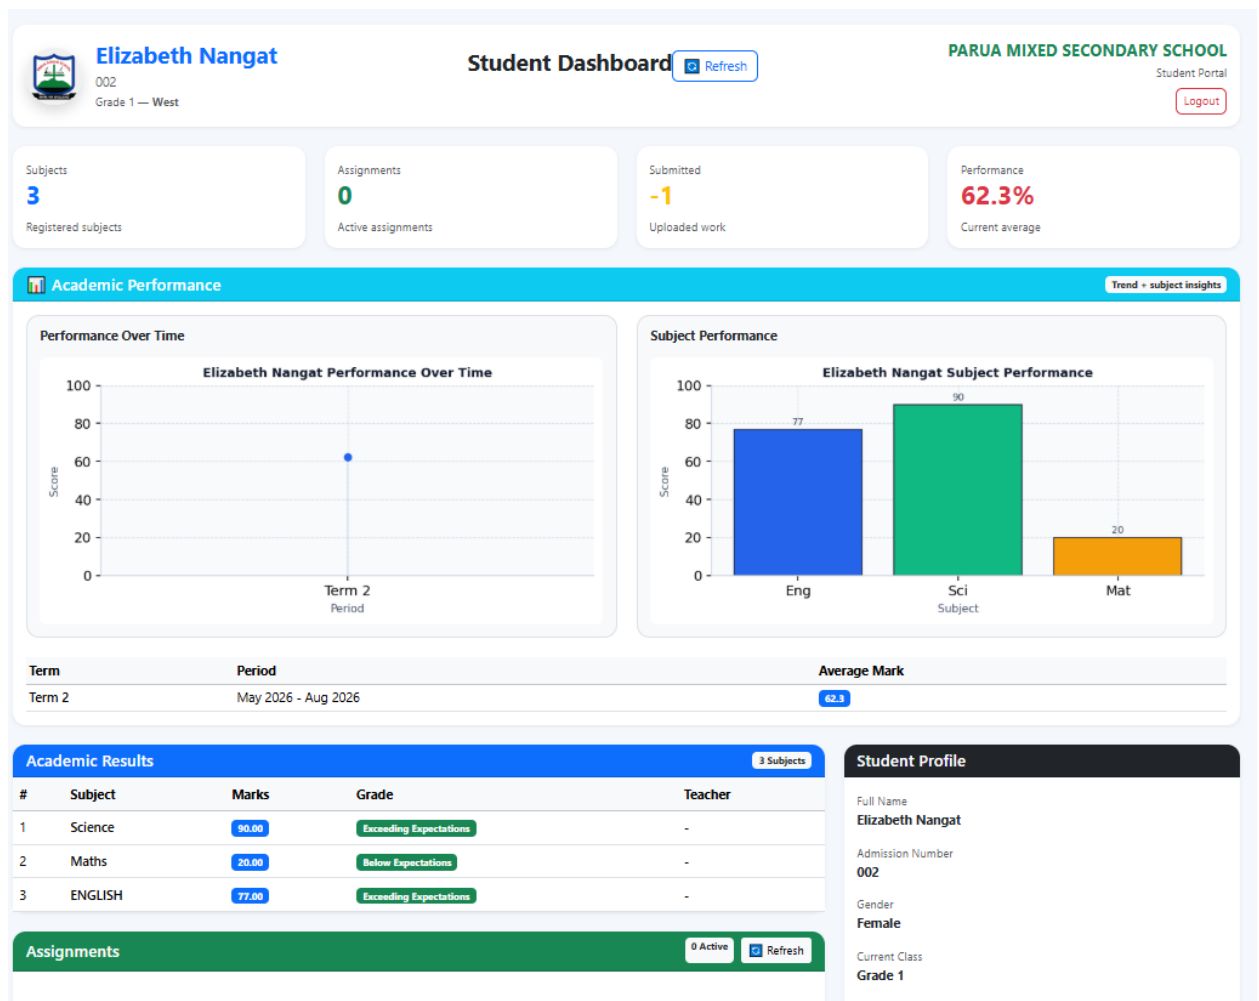

- Teacher responsibilities
- Teaching workflow
- Attendance recording
- Marks entry
- Report card generation
- Student performance tracking
- Dashboard cards
- Menus
- Advantages
- Limitations
- Best practices
- Screenshot placeholders

Chapter 7 – Student Dashboard

Explain:

- Student responsibilities
- Viewing results
- Attendance
- Timetable
- Announcements
- Report cards
- Academic progress
- Dashboard cards
- Menus
- Advantages
- Limitations
- Screenshot placeholders

Chapter 8 – Bursar Dashboard

Explain:

- Fee collection
- Receipts
- Student statements
- Fee balances
- Fee structures
- Financial reports
- Daily collections
- Dashboard widgets
- Screenshot placeholders

Every Chapter Will Follow This Format

Dashboard

Overview

The Dashboard is the first screen displayed after a successful login. It serves as the command center of Brainet Analytics by presenting a real-time overview of school activities and important statistics. Instead of opening multiple modules to locate information, users can monitor academic, financial, and administrative performance from one place.

Purpose

The Dashboard enables users to:

- View school performance at a glance.
 - Monitor student and staff statistics.
 - Access quick links to commonly used modules.
 - Track recent activities and notifications.
 - Monitor financial summaries and fee collections.
 - Review examination and attendance statistics.
-

Who Uses This Dashboard?

Role	Access
System Administrator	Full Access
Principal	Full Access
Director of Studies	Academic Information
Accountant	Financial Information
Teacher	Academic Information
ICT Administrator	Full Access

Features Available

- Total Students
 - Total Teachers
 - Total Classes
 - Fee Collection Summary
 - Outstanding Fee Balance
 - Recent Payments
 - Recent Admissions
 - Notifications
 - School Calendar
 - Examination Statistics
 - Performance Charts
-

Why is this Dashboard Important?

School administrators need timely information to make informed decisions. The Dashboard consolidates critical data from multiple departments into one view, reducing the need to navigate through different menus.

For example, if fee collection decreases or student attendance drops, the dashboard highlights these trends immediately, enabling prompt intervention.

Advantages

- Saves time by centralizing information.
- Improves decision-making.
- Provides real-time statistics.
- Reduces paperwork.
- Improves institutional monitoring.
- Enhances communication between departments.
- Displays important alerts immediately.

Limitations

Although the Dashboard is highly effective, users should be aware of the following:

- Information depends on timely data entry.
- Internet connectivity is required for cloud deployments.
- Incorrect user permissions may restrict available information.
- Large datasets may take longer to load on slower networks.
- The Dashboard provides summaries; detailed information is accessed through individual modules.

Best Practices

- Review the Dashboard at the beginning of each working day.
- Resolve outstanding notifications promptly.
- Verify displayed statistics against departmental records when necessary.
- Regularly update school information to ensure accurate reporting.

Principal Dashboard Screenshot

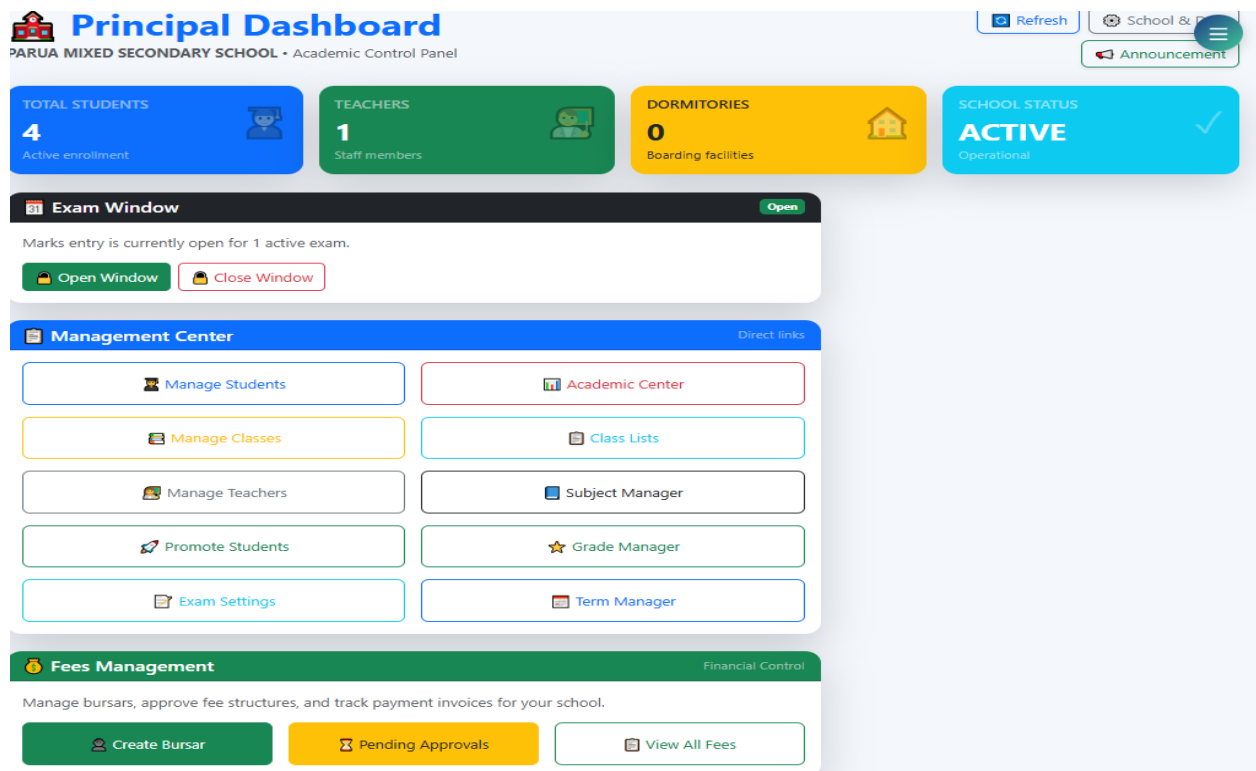

Figure 4.1: Brainet Analytics Principal Dashboard

Notes

The Dashboard automatically updates whenever new students are admitted, fees are recorded, marks are entered, or reports are generated.

- Summary

Student Management Example

Purpose

The Student Management module maintains comprehensive student records from admission through graduation. It centralizes demographic, academic, and administrative information, reducing reliance on paper files and making records easier to retrieve.

Roles

- Administrator
- Principal
- DOS
- Class Teacher (view or edit permissions as assigned)

What Can Be Done?

- Register new students.
- Update student profiles.
- Assign students to classes and streams.
- Record guardian information.
- Transfer or promote students.
- Search and filter student records.
- Print admission lists and student reports.

Why Is It Needed?

Without a centralized student information system, schools often maintain multiple paper registers, increasing the risk of errors, duplicate records, and lost information. This module provides a single, accurate source of student data that supports academic, administrative, and reporting processes.

Advantages

- Faster admissions.
- Centralized student records.
- Easy student search.
- Accurate reporting.
- Reduced paperwork.
- Better data security.
- Supports promotions and transfers.

Limitations

- Data accuracy depends on correct entry.
- Changes should be restricted to authorized users.
- Large schools require regular data backups and good internet connectivity for cloud access.

Brainet Analytics System

School Management System

CHAPTER 21

Accessing Brainet Analytics

21.1 Introduction

Brainet Analytics is a secure, cloud-based School Management Information System (SMIS) designed to be accessible from anywhere with an internet connection. Authorized users can securely log in using their assigned usernames and passwords to access the modules relevant to their roles.

The platform is optimized for desktop computers, laptops, tablets, and modern smartphones, enabling school administrators, teachers, accountants, and other authorized staff to manage school operations efficiently from virtually any location.

21.2 System Access

Schools and authorized users can access Brainet Analytics through the official websites below:

Official Domains

Main Website

<https://brainetanalytics.co.ke>

School Management Portal

<https://www.brainetanalytics.co.ke/>

21.3 Browser Requirements

For the best experience, use one of the following modern web browsers:

- Google Chrome (Recommended)
- Microsoft Edge
- Mozilla Firefox
- Safari
- Opera

Using the latest browser versions ensures compatibility, security, and optimal performance.

21.4 Login Requirements

To access the system, users must have:

- A valid username.
- A secure password.
- An active user account assigned by the System Administrator.
- An internet connection.

Each user can only access the modules permitted by their assigned role.

21.5 Getting Brainet Analytics for Your School

Brainet Analytics is available for educational institutions seeking a modern, secure, and comprehensive school management solution.

Services offered include:

- New School Registration
- System Configuration
- User Account Setup
- Staff Training
- Data Migration
- Technical Support
- System Maintenance

- Feature Customization
- Continuous Updates

Interested institutions are encouraged to contact the development team for a demonstration and consultation.

21.6 Technical Support

Our support team is available to assist with:

- Account setup.
- Password recovery.
- System configuration.
- User training.
- Technical troubleshooting.

- Software updates.
 - Feature enhancement requests.
 - General system inquiries.

21.8 Acknowledgements

The successful development of Brainet Analytics has been made possible through dedication, innovation, and valuable feedback from educators, administrators, accountants, ICT professionals, and institutions that participated in its evaluation and improvement.

Special appreciation goes to all schools and users who continue to trust Brainet Analytics in supporting efficient school management and academic excellence.

Your continued support inspires the ongoing development of new features and improvements.

21.9 About the Developer

Daniel Merkou

Daniel Merkou is the Lead Software Developer and Founder of **DANTECH Solutions**, specializing in the development of secure, scalable, and user-friendly software solutions for educational institutions and businesses.

Brainet Analytics is one of his flagship projects, created to simplify school administration by integrating academics, finance, examinations, reporting, analytics, and administration into one intelligent platform.

His commitment is to deliver innovative digital solutions that improve efficiency, accuracy, transparency, and decision-making in education.

21.10 Thank You

Thank you for choosing **Brainet Analytics** as your trusted School Management Information System.

We sincerely appreciate your confidence in our solution. Every feature within Brainet Analytics has been designed to simplify school administration, improve operational efficiency, and support excellence in education.

We remain committed to continuous innovation, reliable technical support, and delivering technology that empowers schools to achieve their goals.

We look forward to serving your institution for many years to come.

Empowering Schools Through Technology
